

SECURITY ADVISORY

# Salto Security Advisory Salto Space

(Version 6.13.2.1)

**SALTO has released a security update for the on-premise Salto Space software that addresses an issue affecting installations where the logical partition (tenancy) feature is enabled.**

In specific configurations, an authenticated operator with internal network access could perform certain privileged actions across logical partitions within the same installation.

There is no impact across different customers or deployments, and the issue cannot be exploited from the Internet when the system is installed following SALTO best practices.

SALTO SPACE

## Salto Product Security Advisory

**Product:** Salto Space

**Issue:** Tenant Isolation – Cross Partition Privileged Actions

**CVE ID:** requested

**CVSS Score:** 7.1

**Status:** Security Update Available in Version 6.13.2.1.

**Published:** 08/07/2026

**Version:** 1.0

### Affected Product

Salto Space software before version 6.13.2.1

- Only installations using the **logical partition / tenancy feature** are affected
- Installations without partitioning enabled are **not affected**

### Fix Availability

A security mitigation patch is available in version 6.13.2.1

- The update enforces stricter tenant isolation and **blocks cross-tenant execution of sensitive actions, including:**
  - > Door unlock commands
  - > Access-rights assignments
  - > Other privileged operations intended to remain tenant-restricted

All customers using the tenancy feature should upgrade to **version 6.13.2.1** as soon as possible.

## Recommended Customer Actions

To further enhance security after applying the update:

1. Operate Salto Space on a protected internal network and avoid exposing it directly to the Internet.
2. Restrict operator-level accounts to the minimum required and apply least-privilege principles.
3. If feasible, disable the partitioning feature and operate under a single partition.
4. When strong tenant separation is required, consider running separate Salto Space instances (isolated environments) rather than relying solely on logical partitioning.

### SUPPORT

For assistance applying the update or reviewing your configuration, please contact your Salto representative or authorized partner.
